Summary

Enthusiastic and motivated aspiring software engineer with a strong passion for coding and problem-solving. Proficient in Python, Django, REST API, Git, GitHub, JavaScript, MySQL, PostgreSQL, Redis and Celery. Familiar with Docker, CI/CD, and deployment processes. Eager to leverage programming skills to contribute to dynamic software development teams and tackle challenging technical projects. Actively seeking opportunities to further develop expertise in Back-end Development.

Experience

Software Engineer

UIC Group

May 2024 - Present (3 months)

- Successfully managed and supported four distinct projects, ensuring timely delivery and high-quality outcomes.
- Designed and implemented robust APIs using Django Rest Framework, Celery, and Redis to facilitate seamless data integration and communication
- Created and maintained advanced Telegram Bots leveraging Python Telegram Bot, Django, PostgreSQL, and Celery for enhanced user interaction and automation.
- Developed and optimized complex database queries to generate insightful analytical data, improving decision-making processes.
- Identified, troubleshooted, and resolved software bugs to enhance system reliability and performance.
- Enhanced database performance by optimizing queries, reducing execution times, and improving efficiency.
- Engineered effective database architectures to efficiently store and manage data collections, ensuring data integrity and accessibility.

Education

Westminster International University in Tashkent

Bachelor's degree, Business Information Systems

2023 - 2027

- Academic English (communication, researching skills)
- Developing Professional Identity (teamwork, time management skills)
- I, Citizen (critical thinking and problem-solving skills)

UIC Academy

Back-end Plus Level Up

Feb 2024 - May 2024

- Leveraged my Back-end skills to strengthen development skills.
- Utilized Python, Django, Django REST Framework, PostgreSQL, Redis, Celery to build projects
- Utilized Git, GitHub, Docker to manage versions and packages.

- Implemented GitHub Actions for CI/CD

Bobir Akilkhanov Tech Academy

Full Stack Web Development

Mar 2022 - Feb 2023

- Build e-commerce website by implementing Python/Django and query optimization.
- Build a Full-stack website by utilizing REST API, Django Rest Framework, Axios, Vue.js, PostgreSQL.

Academic Lyceum of Westminster International University in Tashkent

Computer Software Technology/Technician

Sep 2021 - Jun 2023

Licenses & Certifications

Web Developer - Bobir Akilkhanov Tech Academy

Issued Mar 2022 - Expires Feb 2023

Problem Solving (Basic) Certificate - HackerRank

Skills

PostgreSQL • Git • GitHub • API Development • Telegram Bots • Database Architecture Design • Python (Programming Language) • Celery • Redis • Problem Solving

Honors & Awards

Successful student - Bobir Akilkhanov Tech Academy

Feb 2023

Successfully completed the "Full Stack-Python" course, mastering Python, Django, Django Rest Framework, PostgreSQL, HTML, CSS, JavaScript, and Vue.js, achieving the highest score of 96 out of 100.
